

Know before you go

Preparing to travel this Easter holiday

Before you set off

- Have all your travel documents, organised and easy to access.
- Create copies of passports, visas and travel insurance information. Keep them separate from the originals.
- Give your itinerary and travel details to family and friends so they know where you are going and when you will return home.
- Pack all liquids over 100ml in your hold luggage.
- Liquids carried in your hand luggage must be under 100ml and held in a clear plastic bag no more than 20cmx20cm in size.

Airport security

- Have your boarding pass in hand and your passport open at the photo page.
- Do not wear too many accessories; they will need to be removed for your security check.
- Laptops and tablets need to be removed from your bag and screened separately in the trays provided.
- Put what you can in your hand luggage before you reach the scanners.
- Be prepared to remove your shoes if required.

Returning to the UK

- If you have a microchipped passport – use an e-passport gate. You will get through the border much faster.
- Some airports allow 12-17 year olds to use e-passport gates when accompanied by an adult.
- Have your passport open and removed from any covering.
- Take off any hat and sunglasses you are wearing.
